

# Save Time, Reduce Costs

## Smart Glasses Powered Solutions

With AR technology, warehouses and distribution centers enjoy a combination of accuracy and human influence for the optimum working environment.

Vuzix smart glasses improve warehousing for staff at all levels. Checklists, pick information and video recording allow for errors to be spotted immediately, enabling a higher level of efficiency. Users benefit from carrying less equipment and leaving both hands free.

### Barcode Scanning

Scan barcodes by looking at what you want to scan, or 'vision picking.' Vuzix Smart glasses unique heads-up display format makes this possible.

### Order Picking and Fulfillment

The smart glasses' connected picker receives all necessary pick and order information in a convenient heads-up format. Instant user feedback on the success of a pick decreases overall errors.

### Video Recording

Recording enables managers to spot errors in picking and inefficiencies in workplace processes. Videos can also be used for interactive training purposes when onboarding new staff.

## Industry Benefits

- Decrease average pick time
- Fewer order mistakes
- Video feedback to managers
- Replaces bulky scanner and clipboard

## Proven Results

- ✓ 20% increase in picking speed; 25% picking error reduction with retail customers
- ✓ Load-time reductions. realtime load plan adjustments with air cargo Singapore Air
