

Westbase.io RealWear Training

Our training services provide you, your teams and your end customers with the knowledge and skills to maximise your RealWear opportunity. Training is typically delivered remotely, though in-person sessions can be arranged on request.

Basic Training

- Practical guidance on getting up and running with a Navigator or HMT device, including:
 - How to wear the Navigator or HMT
 - Voice commands
 - Getting connected
 - Navigating the device interface

Advanced Training

- An in-depth view into the RealWear ecosystem, covering:
 - Using Foresight to manage devices
 - Connecting and integrating PPE with the Navigator or HMT
 - A deep dive into use cases such as Workflow and Remote Expert

Bespoke Training

- Westbase.io can also develop and deliver training which is specific to your use case, covering application use within the RealWear environment.
- For access to bespoke training services, please contact your account manager.

Booking & Pricing

Booking: Training services can be booked with your account manager.

Pricing: Please contact your account manager for training pricing. Bespoke pricing is available on a per-project basis.
